

## Sıvıları Ölçme

Sıvı maddeleri ölçmek için litre kullanırız. Litre kısaca **L** ile gösterilir.

↳ Sıvı maddeler, akışkan maddelerdir. Bu yüzden belirli bir şekilleri yoktur. Buldukları kabın şeklini alırlar. Sıvı maddelerin miktarı dereceli kaplarla ölçülür.

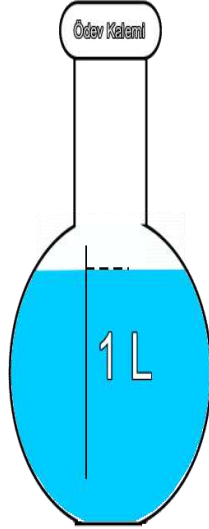

1 Litre = 1 000 mL'dir

$$1 \text{ L} = \frac{1}{4} + \frac{1}{4} + \frac{1}{4} + \frac{1}{4} = \frac{4}{4} = 1$$
